

VALENTÍN KEBAT

La Plata, Buenos Aires, Argentina | valenkebat@gmail.com | (221) 3573136 | github.com/Valenkebat

PROFESSIONAL SUMMARY

Data Engineer with 3+ years of experience specialized in Python and data pipelines. Proficient in cloud infrastructure (AWS) and orchestration tools (Airflow, dbt). Experience designing automation and integration solutions across systems (Jira, Confluence, GitLab) to streamline data team workflows. Focused on data quality, scalability, and automation.

WORK EXPERIENCE

Data Engineer | Moni Actualidad (FINTECH) 2024 – Present

- Designed, developed, and maintained scalable data pipelines using Python and SQL, ensuring data quality and integrity in production environments.
- Orchestrated and monitored critical workflows with Apache Airflow, including diagnosing and resolving DAG incidents.
- Managed cloud infrastructure on AWS (Redshift, S3, ECS/Fargate) for large-scale data processing and storage.
- Developed and maintained business domain models (loans, customers, among others) with dbt using a medallion architecture (bronze, silver, gold), ensuring traceability and consistency across sources.
- Built control dashboards and reports in Tableau, including data source migrations and optimization of published models.
- Built automation and integration tooling across internal systems (Jira, Confluence, GitLab) to streamline technical documentation and ticket management for the Data team.
- Collaborated on documenting data architectures and processes (Confluence) to improve traceability of the team's technical knowledge.

Data Engineer & Analyst | Ministry of Public Works of Argentina 2020 – 2024

- Developed Python scripts for large-scale geodata normalization and cleaning.
- Maintained and optimized SQL Server datasets using PL/SQL and Python.
- Developed and maintained control dashboards with Tableau to track management indicators.
- Documented processes and tracked tasks using Trello.

GIS Data Operator | Provincial Bureau of Statistics Feb 2020 – Sept 2020

- Managed data loading and cartography updates using ArcGIS 10.2.

Large-Format Printing Operator | Manet Impresiones 2016 – 2020

- Managed and produced large-format printing and plotting jobs.

TECHNICAL SKILLS

Programming: Python (Advanced), SQL, JavaScript / TypeScript, Java.

Data & Cloud: Apache Airflow, dbt, dlt, AWS, Docker, Node.js.

Databases: PostgreSQL, SQL Server, MySQL, Redis.

EDUCATION

Certification in Cloud Data Engineering | ITBA (Buenos Aires Institute of Technology) Jun 2026 – Dec 2026

- Cloud Architecture: Python, Linux, and database fundamentals; cloud architecture on AWS (Compute, Storage, Networking, Databases, Serverless, Streaming).
- Machine Learning Engineering: batch and streaming data architectures on AWS; Data Science pipelines and end-to-end ML system development.
- Data Engineering Applications: Pandas, Airflow, Docker, Spark, and building distributed pipelines with API and database integrations.

Bachelor's in Computer Programming (In progress) — School of Computer Science, National University of La Plata (UNLP).

Bachelor's in Sociology (2014–2017) — School of Humanities and Educational Sciences, UNLP.

COURSES & CERTIFICATIONS

Data Engineering Training — Dateneo | 2025

- Technologies: dbt, dlt, and AWS.

Diploma in Data Engineering — National Technological University (UTN FRRe) | 2024

- Repository: github.com/Valenkebat/diplomatura_DE_utn

LANGUAGES

Spanish: Native. **English:** Intermediate (B1).

ABOUT ME

I'm a builder at heart, whether orchestrating data pipelines or designing home automation systems with a Raspberry Pi. I enjoy building and understanding complex systems. In my free time I play trombone in music projects, exercise, and ride my bike. As a kid I played rugby.
